Changes in authorship

(a) Corresponding author requests addition of extra author before publication

1. Clarify reason for change in authorship
2. Check that all authors consent to addition of extra author

- All authors agree
  - Get new author to complete journal’s authorship declaration (if used)
  - Amend contributor details (role of each contributor/author) if included
  - Proceed with review/publication
- Authors do not agree
  - Suspend review/publication of paper until authorship has been agreed by all authors, if necessary, via institution(s)

Note: Major changes in response to reviewer comments, e.g. adding new data might justify the inclusion of a new author.
