Research Ethics Consultancy  
Services (AHRECS)

[http://cdn.static-economist.com/sites/default/files/imagecache/full-width/images/print-edition/20161126\\_BKP003\\_o.jpg](http://cdn.static-economist.com/sites/default/files/imagecache/full-width/images/print-edition/20161126_BKP003_o.jpg)

What is authorship?

# What constitutes authorship?

From COPE  
Discussion  
Document  
(2014)

- Authorship can refer to the
  - Creator or originator of an idea
  - Those who develop product that disseminates intellectual or creative works
- Authorship conveys significant privileges, responsibilities, and legal rights
- Forms basis for rewards and career advancement in academia

What constitutes authorship? COPE Discussion Document

*COPE Council  
9 June 2014*

Why does it matter?

Performance

Jobs Grants  
Rankings  
Prestige

International Committee of  
Medical Journal Editors (2013)  
**four** conditions be met before  
someone be included as an  
author...

<http://2008.people.com.cn/mediafile/200807/30/F200807301325421083631956.jpg>

1. Substantial contributions to
  - a. the **conception** or **design** of the work; or
  - b. the acquisition, analysis, or interpretation of **data** for the work; **AND**

**2. Drafting** the work or  
**revising** it critically for  
important intellectual content;  
**AND**

3. **Final approval** of the version  
to be published; **AND**

4. Agreement to be **accountable** for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

**approval**     **a**  
**accountable**     **ta**  
**writing**     **va**

**BUT**

**Not  
everyone  
agrees that  
it has to be  
*all 4!***

Some authors will not have the **technical or linguistic expertise** to understand the contributions of other authors

Multidisciplinary

Multinational

Some papers are created by **multiple teams** combining data and analyses which result in huge numbers of authors

One high energy physics paper had 2080 authors!

Some fear that **'final approval' process may be manipulated** to exclude junior researchers who otherwise meet the definition

# China Association for Science & Technology (CAST)

中国科学技术协会  
China Association for Science and Technology

- Five Codes of Conduct for Authors Publishing in International Journals

1. Do not engage a **third party** (defined as any individual or organization other than the author) for **ghost-writing** services. Researchers should be the bona fide authors of their papers based [on] research conducted by themselves with real experimental data.
2. Do not engage a **third party to submit a paper** on the author's behalf. Researchers should have a sound understanding and clear knowledge of the submission process for international academic journals, and are responsible for the direct submission of their own papers and subsequent feedback engagement with the reviewers.
3. Do not entrust **third parties to revise the content** of authors' papers. Researchers can engage the services of third parties to proofread and refine the language based on the original content that authors develop. Third parties should not be engaged to revise research content in the guise of proofreading or language refinement.
4. Do not engage in **identity fraud and/or falsify information of author-suggested reviewers**. Researchers have a responsibility to ensure that the identities and contact information of all suggested reviewers are real when required by the journal editors. Researchers should not engage in fraudulent behavior of or manipulate the peer review process.
5. **Do not violate the ethical standards and responsibilities required of authors**. Authors should review their articles and agree to publish their papers prior to submission. All researchers that are named in an article must have contributed substantially to the research.

# Internationally

Long-standing concerns that the names that appear at the top of an article do not reflect the true authorship, because...

Computed by Olivier H. Beauchesne and

# Gift, honorary or prestige authorship

Someone who has  
insignificant involvement has  
been added

# Ghost authorship

Junior staff who made significant contributions have been omitted ('White bull effect')

Both

## Disguising origins of papers

- Ghostwriting by industry to promote product
- Contracting out writing
- Exploitation of junior staff

# Where do problems arise for editors?

## What constitutes authorship? COPE Discussion Document

*COPE Council  
9 June 2014*

- *For editors, problems commonly stem from*
  1. *People who claim that they deserve to be authors but have been **omitted** ✓*
  2. *People who have been **included** as authors but without their consent*
  3. *Individuals who agree to be authors but who **back away from responsibility** if something goes wrong*
  4. ***Confusion over multiple authorship***

## Cases

---

---

Showing 1–25 of 111 results.

## Are there problems in China?

- Survey by the Chinese Association of Science and Technology (CAST) (2013) of 33,000 respondents
  - 50.1% reported thinking 'ghost authorship' was common
  - 43.7% reported thinking plagiarism was common

# National Science Review

2: 122–125, 2015

doi:

10.1093/nsr/nwv002

中国科学院  
CHINESE ACADEMY OF SCIENCES

**Renzong Qiu**

Bioethicist at the Chinese Academy of Social  
Sciences' Institute of Philosophy in Beijing

- *...there is a massive market for buying and selling authorships of academic papers (2015)*

## National Science Review

2: 122–125, 2015

doi:

10.1093/nsr/nwv002

中国科学院  
CHINESE ACADEMY OF SCIENCES

**Wei Yang**

Director of the National Natural Science  
Foundation of China in Beijing

- *...in China, famous scientists are often invited to be an author of a paper in order to boost the chance of its acceptance...*
- *Similarly, government officials who pursue a part-time PhD are often offered authorships on projects [in which] they did not participate. Such cases clearly constitute academic misconduct. (2015)*

## National Science Review

2: 122–125, 2015

doi:

10.1093/nsr/nwv002

中国科学院  
CHINESE ACADEMY OF SCIENCES

**Chunfa Wang**

Executive Secretary of the Chinese  
Association of Science and Technology in  
Beijing

- *Ghost or guest authorships are dangerous practice. In addition to ethical concerns, they are misleading, turning nonexperts into experts, especially under the current evaluation system in China. This can affect long-term research directions and grant allocations. (2015)*

## The Causes?

- Academics around the world are under increasing pressure to produce research
  - Fear these pressures will corrode research integrity voiced in many countries
- Uneven mix of policies and practices
  - Some legitimate
  - Some context-specific and appropriate
  - Some misconduct/corrupt

Some of the  
variables

**Corrupt-practices**  
**Power-relations**  
**Culture**  
**Discipline**  
**Medium**  
**Time**

A word cloud on a black background featuring five terms: 'Corrupt-practices' (orange), 'Power-relations' (white), 'Culture' (orange), 'Discipline' (white), and 'Medium' (blue). The word 'Time' is positioned to the right of the main cluster in white.

- **DISCIPLINE**

- *...not always clear or appropriate that the criteria for authorship should be the same across different disciplines. (Kalichman, 2011)*

- **CULTURE**

- *it is... necessary to explore the role of local institutional and cultural contexts in failing to close the gap between conforming to globally acknowledged criteria [ICMJE guidelines] and the actual situation on the ground where they should be applied. (Yukawa et al., 2014)*

- **HIERARCHY**

- *...the [Hong Kong survey of social scientists] shows that power ordering, where author order is decided by considerations of hierarchy and management control within research rather than intellectual contribution, is also widely practised. (Macfarlane, 2015)*

- ‘publish or perish’ culture in Chinese universities may have incentivised forms of academic misconduct conducive to publishing large quantity of papers of low quality...
  - Jane Qiu (2010)

**nature** International weekly journal of science

# 关系

## *Guanxi networks*

- Publication ethics
  - *operation of guanxi networks [as part of 'danweization'] is so entrenched that it raises questions about the integrity of knowledge production and academic autonomy in China...*
    - Hongtao Li & Chin-Chuan Lee (2014)

# 急功 近利

- *jigong jinli*
  - seeking quick success and short-term gain
    - Zeng Guoping, 曾国平, Director of Institute of Science Technology and Society, Tsinghua University (2010)  
<http://www.nature.com/news/2010/100112/full/463142a.html>

What **could**  
journals do?

Public policy of  
who should be  
listed as an author

Require all authors  
to sign a statement  
of authorship

Check claims

Restrict industry-  
sponsored  
ghosting

Public policy of  
who should be  
listed as an author

- *...all journals should have a basic policy on what they consider qualifies someone to be an author of a research paper...*
- *This policy should be **stated clearly** in the journal's information for authors.*
- *If the policy is based on the [work of another group] that should be stated.*

What constitutes authorship? COPE Discussion Document

*COPE Council  
9 June 2014*

Require all authors  
to sign a statement  
of authorship

- Journals should... consider requesting all named authors sign a **statement of authorship** as a condition of publication...
  - A declaration that
    - that person, and all other named **authors**, fulfil the **authorship criteria** found in journal's authorship policy
    - no-one deserving of authorship have been **omitted**
    - that person takes **responsibility** for integrity of the paper

## What constitutes authorship? COPE Discussion Document

*COPE Council  
9 June 2014*

Require all authors  
to sign a statement  
of authorship

- Journals should... consider requesting all named authors sign a statement of authorship as a condition of publication...
  - Statement of what exactly that person **contributed** to the paper
    - **Free text** not tick-box
    - Journals should consider publishing this information
  - Agreement about **order of authors**

# A Systematic Review of Research on the Meaning, Ethics and Practices of Authorship across Scholarly Disciplines

Ana Marušić<sup>1\*</sup>, Lana Bošnjak<sup>2</sup>, Ana Jerončić<sup>1</sup>

- Marušić A, Bošnjak L, Jerončić A (2011) A Systematic Review of Research on the Meaning, Ethics and Practices of Authorship across Scholarly Disciplines. PLoS ONE 6(9): e23477. doi:10.1371/journal.pone.0023477
- Author Contributions
  - Conceived and designed the experiments: AM. Performed the experiments: AM LB AJ. Analyzed the data: AM LB AJ. Contributed reagents/materials/analysis tools: AM LB AJ. Wrote the paper: AM. Critical revision of the manuscript: LB AJ.

## Check claims

- **Contributors who are not authors**
  - Individuals who meet only some of the criteria could be listed in **acknowledgment**
  - COPE recommends these also sign a **declaration** of agreement
    - acknowledgment may imply the individual **endorses** the work
    - **check contributor did not deserve authorship** and had not been pushed out to 'ghost collaboration' (Shaw & Elger, 2017)
    - practice of using acknowledgements to remove potentially negative **reviewers**
- **Gift authorship**
  - Journals might also **send correspondence about submitted paper to all named authors**
    - Reduce possibility that some included without their **consent**
    - Remind authors of **definition and responsibilities** of authorship

## Restrict industry-sponsored ghosting

- **Certification that the authors**
  - or other individuals associated with the study had **not received money** or in-kind payments from **industry** sponsors or its agents in lead up to manuscript submission, and
    - International Committee of Medical Journal Editors.
  - **had access to**
    - study **design**,
    - raw **data**,
    - data **analyses**,and that the authors take full **responsibility** for scientific validity of the study.
    - Mansi et al. (2012)

# What requirements are journals imposing?

- Wu and Zou (2015)
  - *Review of 229 Chinese-language biomedical journals from A Guide to the Core Journals of China*
  - **most journals (86%) listed authorship criteria**
    - × 33
    - ✓ 196
  - Higher than a random sample of 600 from JCR at 62.5% (Resnik et al., 2016)
  - **None reflected 2013 ICMJE Recommendations on authorship**

---
